As the world’s largest exporter and one of its largest importers, China plays a major role in the interconnected global economy. China has long been a supporter of plant biotechnology and is one of the “founder biotech crop countries” that has cultivated biotech cotton since the 1990s. However, delays in China’s import approvals have significant repercussions in terms of economic growth, food security, and sustainability both in China and around the globe.

**Significant domestic impact from China’s delayed import approvals**

As summarized below, Informa Consulting recently conducted analysis of resulting economic hardships that China has experienced over the past five years due to its delayed import approvals.

<table>
<thead>
<tr>
<th>Crop</th>
<th>Estimated Losses</th>
<th>Potential Value to Gain</th>
</tr>
</thead>
<tbody>
<tr>
<td>Corn</td>
<td>Was restricted by over 2.5 million MT</td>
<td>Could increase by 45,000 MT</td>
</tr>
<tr>
<td>Soybean</td>
<td>Was restricted by over 700,000 MT</td>
<td>Could increase by 7 million MT</td>
</tr>
<tr>
<td>Canola</td>
<td>Data unavailable</td>
<td>Could increase by 1.7 million MT</td>
</tr>
</tbody>
</table>

**Biotech investment fits China’s innovation-forward attitude**

China has approved 60 biotech crop events for food and feed use and cultivation since 1994, and made government investments of about US$3.8 billion in domestic biotechnology since 2008. It’s logical that China should have a pro-biotech regulatory framework.

**Benefits of biotech cotton grown in China**

- 2.92 million hectares planted in 2016
- US$18.6 billion increase in farm income (1997-2015)
- 10% increase in yield
- 60% decrease in pesticide application

**More timely biotech imports approvals would benefit China in many aspects**

- **Food security**: By optimizing overseas agricultural investments and maintaining a stable food supply for its population of 1.4 billion
- **Sustainable technologies**: By elevating China’s leadership position in helping farmers adopt more sustainable agricultural practices
- **Global trade leadership**: By helping China serve as a pro-trade, innovation-friendly role model for countries in southeast Asia
