

## Publications Identified in Literature Search for 2021 Peptide Table

Ahmad, I., et al. (2019). An overview of gluten-free foods and related disorders. London, Academic Press Ltd-Elsevier Science Ltd.

Ahola, H. G., et al. (2020). "Immunochemical analysis of oat avenins in an oat cultivar and landrace collection." *Journal of Cereal Science* 95: 8.

Altenbach, S. B., et al. (2019). "Elimination of Omega-1,2 Gliadins From Bread Wheat (*Triticum aestivum*) Flour: Effects on Immunogenic Potential and End-Use Quality." *Frontiers in Plant Science* 10: 12.

Altenbach, S. B., et al. (2020). "Deciphering the immunogenic potential of wheat flour: a reference map of the salt-soluble proteome from the US wheat Butte 86." *Proteome Science* 18(1): 13.

Altenbach, S. B., et al. (2020). "Exploiting the reference genome sequence of hexaploid wheat: a proteomic study of flour proteins from the cultivar Chinese Spring." *Functional & Integrative Genomics* 20(1): 1-16.

Altenbach, S. B., et al. (2020). "Reducing the Immunogenic Potential of Wheat Flour: Silencing of Alpha Gliadin Genes in a US Wheat Cultivar." *Frontiers in Plant Science* 11: 15.

Bodkhe, R., et al. (2020). "Human gut-derived commensal suppresses generation of T-cell response to gliadin in humanized mice by modulating gut microbiota." *Anaerobe*: 102237.

Bolukbasi, S., et al. (2019). "Pachychoroid Pigment Epitheliopathy and Choroidal Thickness Changes in Coeliac Disease." *Journal of Ophthalmology* 2019: 6.

Boukid, F., et al. (2019). "A Complete Mass Spectrometry (MS)-Based Peptidomic Description of Gluten Peptides Generated During In Vitro Gastrointestinal Digestion of Durum Wheat: Implication for Celiac Disease." *Journal of the American Society for Mass Spectrometry* 30(8): 1481-1490.

Brouns, F. R., et al. (2019). "Adverse Reactions to Wheat or Wheat Components." *Comprehensive Reviews in Food Science and Food Safety* 18(5): 1437-1452.

Cabanillas, B. (2020). "Gluten-related disorders: Celiac disease, wheat allergy, and nonceliac gluten sensitivity." *Critical Reviews in Food Science and Nutrition* 60(15): 2606-2621.

Calvanese, L., et al. (2019). "Structural insights on P31-43, a gliadin peptide able to promote an innate but not an adaptive response in celiac disease." *Journal of Peptide Science* 25(5): 10.

Cavaletti, L., et al. (2019). "E40, a novel microbial protease efficiently detoxifying gluten proteins, for the dietary management of gluten intolerance." *Scientific Reports* 9: 11.

Chibbar, R. and L. A. Dieleman (2019). "The Gut Microbiota in Celiac Disease and Probiotics." *Nutrients* 11(10): 18.

Christophersen, A. (2020). "Peptide-MHC class I and class II tetramers: From flow to mass cytometry." *Hla* 95(3): 10.

Christophersen, A., et al. (2019). "Distinct phenotype of CD4(+) T cells driving celiac disease identified in multiple autoimmune conditions." *Nature Medicine* 25(5): 734-+.

Christophersen, A., et al. (2019). "Therapeutic and Diagnostic Implications of T Cell Scarring in Celiac Disease and Beyond." *Trends in Molecular Medicine* 25(10): 836-852.

Cook, L., et al. (2020). "Circulating gluten-specific, but not CMV-specific, CD39(+) regulatory T cells have an oligoclonal TCR repertoire." *Clinical & Translational Immunology* 9(1): 10.

Dahal-Koirala, S., et al. (2019). "Discriminative T-cell receptor recognition of highly homologous HLA-DQ2-bound gluten epitopes." *Journal of Biological Chemistry* 294(3): 941-952.

Dahal-Koirala, S., et al. (2020). "On the immune response to barley in celiac disease: Biased and public T-cell receptor usage to a barley unique and immunodominant gluten epitope." *European Journal of Immunology* 50(2): 256-269.

Daly, M., et al. (2020). "Mapping Coeliac Toxic Motifs in the Prolamin Seed Storage Proteins of Barley, Rye, and Oats Using a Curated Sequence Database." *Frontiers in Nutrition* 7: 17.

Di Stasio, L., et al. (2020). "Comparative Analysis of in vitro Digestibility and Immunogenicity of Gliadin Proteins From Durum and Einkorn Wheat." *Frontiers in Nutrition* 7: 7.

EGGESBO, L. M., et al. (2020). "Single-cell TCR sequencing of gut intraepithelial gamma delta T cells reveals a vast and diverse repertoire in celiac disease." *Mucosal Immunology* 13(2): 313-321.

Elli, L., et al. (2019). "Management of celiac disease in daily clinical practice." *European Journal of Internal Medicine* 61: 15-24.

Escudero-Hernandez, C., et al. (2020). "Circulating Dendritic Cells from Celiac Disease Patients Display a Gut-Homing Profile and are Differentially Modulated by Different Gliadin-Derived Peptides." *Molecular Nutrition & Food Research* 64(6): 10.

Esposito, S., et al. (2019). "Genistein antagonizes gliadin-induced CFTR malfunction in models of celiac disease." *Aging-Us* 11(7): 2003-2019.

Fernandez, A., et al. (2019). "Safety Assessment of Immune-Mediated Adverse Reactions to Novel Food Proteins." *Trends in Biotechnology* 37(8): 796-800.

Ficco, D. B. M., et al. (2019). "Comparison of gluten peptides and potential prebiotic carbohydrates in old and modern *Triticum turgidum* ssp. genotypes." *Food Research International* 120: 568-576.

Fiedler, K. L., et al. (2019). "Detection of gluten in a pilot-scale barley-based beer produced with and without a prolyl endopeptidase enzyme." *Food Additives and Contaminants Part a-Chemistry Analysis Control Exposure & Risk Assessment* 36(8): 1151-1162.
